

```
// ExemploDoWhile.java

public class ExemploDoWhile {
    public static void main (String args[]) {
        int min = Integer.parseInt(args[0]);
        int max = Integer.parseInt(args[1]);
        do {
            System.out.println(min+" < "+max);
            min++; max--;
        } while (min < max);
        System.out.println(min+" < "+max+" Condicao invalida!");
    }
}
```
